IN THE FIGURES

Applicant's Representatives recently discovered that Figure 2 of the Formal Drawings, filed with the application, contains a typographical error. In the first line of the sequence, the "O" at position 46 should be "Q" to represent a glutamine residue. As indicated on page 11, line 25 through page 12, line 2, "O" is not one of the abbreviations set forth whereas "Q" is. Further, amino acid residue number 46 of Figure 5 (SEQ ID NO:111), which corresponds to amino acid residue number 46 of Figure 2, is clearly glutamine. This error will be corrected in the Formal Drawings to be submitted after receipt of a Notice of Allowance.
